

Genetically Modified Foods: Are They a Problem? A pro-con debate  
Wednesday, 7 December 2011: 10:45 AM - 11:45 AM, CC, Costa Maya 1

**Amal Assa'ad, MD,**

Professor,

Cincinnati Children's Hospital Medical Center, Cincinnati, OH

**Email:** [assaa0@cchmc.org](mailto:assaa0@cchmc.org) or [amal.assa'ad@cchmc.org](mailto:amal.assa'ad@cchmc.org)

**Abstract:**

In this debate I hope to demonstrate to the audience that the mere fact that the food has been genetically modified does not necessitate that the food will cause an adverse effect. This will be based on strong evidence from food challenges with genetically modified foods, and is applicable to multiple foods, from corn to tomatoes to even animal proteins.
