Eosinophils in Asthma and Allergy

Novel Cell death ETosis is a Therapeutic Target for Eosinophilic Disorders

Shigeharu Ueki

Department of General Internal Medicine and Clinical Laboratory Medicine,
Akita University Graduate School of Medicine, Akita, Japan

Outline

- 1, Lytic degranulation, Cytolysis, and Free extracellular granules in vivo
- 2, Mechanisms of eosinophil extracellular DNA trap cell death (ETosis) and release of granules
- 3, Extracellular granules as a secretion competent organelle
- 4, ETosis and eosinophilic inflammatory disorders
